KEY FEATURES

- Special polypropylene container with strengthening ribs makes the battery strong enough to withstand severe operating conditions and arduous vibrations in service
- Use of special Hybrid Alloy System ensures that the battery can withstand the Indian environment and high under-bonnet temperatures
- Improved cycle life: Double-clad separation in the form of a unique rib-free separator profile, reinforced with texturized glass mat, improves cycle life and resistance to bumps and vibrations
- Quick recharge: Unique tree radial grid design, lower internal resistance and a special paste chemistry enhance recharging capability of the battery during use
- Magic eye: Easy to ascertain state of the charge as well as electrolyte level of the battery
- Enhanced safety: Micro-porous filter disc in vent openings help arrest acid fumes and restrict spark propagation inside the battery

- Leak-resistant design: Side vented lid with electrolyte flow back system reduces chance of electrolyte leakage during handling
- Maintenance-free: Requires topping up only once in 6 months. Special alloy ensures low water loss during high temperature operations
